REASONS FOR ALLOWANCE

1. Claims 1-63 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of records fails to disclose or render an obviousness of a filter method for transforming an input digital signal into an output signal having even and odd indexed samples comprising: modifying the even or odd indexed samples by a function of weighted odd or even samples respectively wherein the weighted samples are obtained by at least one weighting operation applied to a difference between two consecutive even-indexed samples as cited in independent claims 1, 10, and 26.

The closest found prior art is Ortega et al. (U.S. 6,757,343). Ortega et al. disclose a wavelet filter method for transforming an input digital signal into an output signal having even and odd indexed samples comprising: modifying the even or odd indexed samples by a function of weighted odd or even samples respectively. However, Ortega et al. fail to disclose the weighted samples are obtained by at least one weighting operation applied to a difference between two consecutive even-indexed samples as seen above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
